

Hi everyone,

I apologize; I usually send out meeting reminders for the Central Arizona Geology club a week in advance. Somehow time slipped by, and the meeting will be this coming Tuesday, September 12. This should be an interesting talk; Chase Hamer will be speaking on the History and Geology of the Bagdad Mine in Bagdad Arizona. Chase is a geologist for the mine.

The meeting will be at the Prescott Public Library, 6:00 pm. As usual, we will start off with "show and tell . . . and ask," so if you have found something of geologic interest over the summer or have a rock or mineral that puzzles you, be sure to bring it in.

Looking forward to seeing everyone after our summer hiatus.

Debbie Allen
