

Wild Wednesday 2. 24 June 2020

We are getting closer and closer to the win-win-win solution that the citizens of Prescott have sought in the negotiations to save around 500 acres of critical lands in the Granite Dells as part of the annexation agreement between Arizona Eco Development and the City of Prescott. All parties, including Save the Dells, have agreed in principle to the Letter of Intent that is the basis for further refinement and implementation. This community has never before witnessed such an effective and vigorous outpouring of citizen support and action on a development proposal as this one.

The views here, taken on April 13, will be forever preserved as a result of this community effort and the good will of this City Council and the developer. This stunning landscape will be part of our legacy to the future, and despite the turmoil in the world right now, this is a success story to boost our spirits. Thanks to all who helped!

When the developer submits plan details, the community can weigh in to Planning and Zoning and then to City Council, which will make the final decisions. Let's assure that our voices are heard as the fine details are worked out, and let's continue to press for the creation of a truly significant Granite Dells Park and Preserve. We can do this!
